

TOP TIPS: COMPETITIONS

- Read the terms and conditions and privacy policy when you enter personal details onto a website – check where your information will go!
- Be very suspicious if things online appear too good to be true – they probably are!
- Talk to your family about setting up a family email address for online shopping and signing up for things online – keep your own personal email address for writing and receiving emails from your friends.
- Sometimes it's hard to separate fun stuff on a website from boring adverts. Read the links on websites carefully and speak to an adult or run your computer security scan if you click on an advert by mistake.
